Notes:

In scope is the end-user view of online surveys. Two scenarios with fictitious questions and also different question types were evaluated for this Accessibility Conformance Report. Also in scope is the HTML report for results of evaluations done with evasys. The backend of the evasys software that was used to create these online surveys was not evaluated and is not in scope of this Accessibility Conformance Report.

The Conformance Claim covers two templates for two scenarios each including a set of different question types. Both includes simple question types like simple forms with input fields, check boxes and radio buttons as well as complex forms with radio button lists and pole graphics. Creators of online surveys are free to use the Design template or the Classic template of evasys version 8.2.

In scope of this Conformance Claim is the support of Firefox with JAWS and NVDA and the support of Chrome with JAWS and NVDA. The Conformance Claim covers also the HTML report, which provides a table view and a diagram view of the surveys result. Both views have been created with accessibility and conformance in mind. Users may switch between both views and are encouraged to do so, for example blind users and users with severe visual impairments. In some rare cases the table view functions also as an alternative version in the sense of the first conformance requirement of WCAG 2x but the majority of the success criteria have been supported in both views. Cases where the concept of alternative version plays a role for conformance are described in the explanations.

Not in scope is the documentation for creators of online surveys. Also, not in scope at the current time is the PDF report. This Accessibility Conformance Report does not cover conformance of the authoring tool (in which customers are creating online surveys) according to ATAG 2.0. Nevertheless, evasys provides additional advices and guidance for survey creators in the light of ATAG 2.0 Part B, beyond the generation of conforming online templates. Part of additional advices and guidances is a mechanism which disables a wcag-logotype for known cases which leads or could lead to a violation of WCAG 2.1 AA. Those cases together with brief instructions for accessible online surveys are listed in the documentation.

Evaluation Methods Used:

The Conformance of the above mentioned two scenarios and the HTML report has been evaluated by manual testing and semi-automated checks.

Manual testing included keyboard testing (with and without Screen Reader), NVDA and JAWS Screen Reader, tested on Windows 10 by using the latest version of Firefox as well as the latest version of Chrome.

Semi-automated checks have been carried out by using Firefox Developer Tools, Web Developer Toolbar (Firefox), Chrome Developer Tools, Color Contrast Analyser and Bookmarklets for different purposes like simulating text spacing (WCAG 2.1). In addition, for WCAG 2.0 AA a user testing with NVDA in combination with Firefox and JAWS has been done.

Notes: Conformance Levels, remarks and explanations address the web interface in which users are answering online surveys or working with HTML reports. According to the WCAG-Note in "Essential Requirements for Authors" the term "supports" has been also used when there is no content present for which a Success Criterion applies. Please find further comments in the Remarks and Explanations.

Criteria	Conformance Level	Remarks and Explanations

In cases where survey creators may use and upload own graphics it is possible to provide alternative texts (alt-texts). This lays in the responsibility of the survey creator. Survey creators are finding brief instructions for the importance of alternative texts in the documentation. Trainers are advised to address this success criterion in trainings for survey creators. The HTML report provides text alternatives for diagrams. User may choose different views of data: Diagram and/or data tables and are able to switch between those views.
1.2.1 Audio-only and Video-only (Prerecorded) (Level A) Also applies to: EN 301 549 Criteria • 9.1.2.1 (Web) • 10.1.2.1 (Non-web document) • 11.1.2.1.1 (Open Functionality Software) • 11.1.2.1.2.1 and 11.1.2.1.2.2 (Closed Software) • 11.8.2 (Authoring Tool) • 12.1.2 (Product Docs) • 12.2.4 (Support Docs) Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Evasys surveys and HTML reports do not include video or multimedia elements.

Survey creators are finding brief instructions on what should not be changed in the online template in order to keep it accessible. The HTML report is also based upon standard-HTML markup. For structure and relationships H-Elements in a correct and logical order and hierarchy have been used. Markup for data table is according to the specification. For providing a more usable navigation – especially quick navigation based upon heading levels - for screen reader user H-elements instead of caption- elements have been used. Sub parts have invisible headings for screen reader user to inform about the relationships and sections and to improve quick navigation especially when users are filtering or comparing results.

Criteria	Conformance Level	Remarks and Explanations
1.3.2 Meaningful Sequence (Level A) Also applies to: EN 301 549 Criteria • 9.1.3.2 (Web) • 10.1.3.2 (Non-web document) • 11.1.3.2.1 (Open Functionality Software) • 11.1.3.2.2 (Closed Software) • 11.8.2 (Authoring Tool) • 12.1.2 (Product Docs) • 12.2.4 (Support Docs) Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Evasys as well as the HTML report provide a meaningful sequence also in cases where paginations have been used by survey creators.

In addition, survey creators find short introductions for addressing this success criterion in the documentation. In the HTML report sensory characteristics are not used as only way for conveying information. When results have been filtered or when comparing results, the HTML report provides different visual cues as well as text cues (for screen reader users).
1.4.1 Use of Color (Level A) Also applies to: EN 301 549 Criteria • 9.1.4.1 (Web) • 10.1.4.1 (Non-web document) • 11.1.4.1 (Open Functionality Software) • 11.1.4.1 (Closed Software) • 11.8.2 (Authoring Tool) • 12.1.2 (Product Docs) • 12.2.4 (Support Docs) Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Evasys, including the HTML report, does not use color as the only visual means indicating an action, prompting a response, or distinguishing visual elements. In all situations which are controllable by evasys and which lay in the responsibility of evasys, color is not used as the only visual means of conveying information. Where colors are used, additional text alternatives for screen reader users are given and also emphasized (for example for indicating the active part in a pagination). Visually impaired users may also activate a contrast switch. Also chart bars in the HTML report, when doing comparisons, do not rely on color alone. In addition to color different patterns have been used and comparisons are also possible in the table view (alternative version).

The diagram view and the table view of HTML reports are accessible by using keyboard. While the diagram view works for some filters, comparisons, and selections by using keyboard ready multiselects the table view provides checkboxes for all filter and comparison options (alternative version). Screen reader users are encouraged to switch to the table view.
2.1.2 No Keyboard Trap (Level A) Also applies to: EN 301 549 Criteria • 9.2.1.2 (Web) • 10.2.1.2 (Non-web document) • 11.2.1.2 (Open Functionality Software) • 11.2.1.2 (Closed Software) • 11.8.2 (Authoring Tool) • 12.1.2 (Product Docs) • 12.2.4 (Support Docs) Revised Section 508 • 501 (Web)(Software) • 504.2 (Authoring Tool) • 602.3 (Support Docs)	Supports	Evasys, including the HTML report, supports keyboard navigation and ensures that keyboard users are not trapped.

Notes: Only Chapter 3 applies. According to "Best Practices for Authors" tables for sections which do not apply have been removed and links to standards/guidelines in headings of sections have been removed.

Chapter 3: Functional Performance Criteria (FPC)

Notes: Not in scope is the documentation for creators of online surveys. This Accessibility Conformance Report does not cover conformance of the authoring tool (in which customers are creating online surveys) according to ATAG 2.0.

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision	Supports	Evasys generates online surveys based on standard HTML accompanied by ARIA techniques to improve relationships between questions and answers in also complex forms. Online surveys which are in scope of this claim as well as the HTML report are fully keyboard operable.
302.2 With Limited Vision	Supports	Evasys supports accessibility for people who have low vision, like high contrast mode, resizable and reflowable content as well as options for survey creators to create surveys beyond 7:1 enhanced contrast of WCAG 2.1 AAA. However, survey creators are responsible for addressing users with limited vision when uploading their own images like charts and diagrams. In the HTML report, the diagram view as well as the data table view are following the relevant WCAG Success Criteria.
302.3 Without Perception of Color	Supports	Evasys generates online surveys and HTML reports which are not relying on perception of color alone. Survey creators find additional short instructions in the documentation.
302.4 Without Hearing	Supports	Evasys generates online surveys and HTML reports for which hearing is not necessary.
302.5 With Limited Hearing	Supports	Evasys generates online surveys and HTML reports for which hearing is not necessary.
302.6 Without Speech	Supports	Evasys, including HTML reports, does not require speech.
302.7 With Limited Manipulation	Supports	Evasys online surveys and HTML reports are fully accessible via the keyboard.
302.8 With Limited Reach and Strength	Supports	Evasys GmbH is not aware of accessibility issues for people with limited reach and strength. Evasys online surveys support users with limited reach and strength by using a logical focus order and a skip link. Also, no simultaneous actions are needed to participate in an online survey or to work with HTML reports.
302.9 With Limited Language, Cognitive, and Learning Abilities	Supports	Evasys supports online surveys where survey creators are free to choose their own wording for questions and answers. Survey creators find brief advices in the documentation. Evasys generates online surveys with a logical focus order and sufficient hints when components are receiving focus to support participants/users of online surveys with limited cognitive abilities.

Chapter 4: Hardware

Notes: Evasys online surveys as well as the HTML report are web based. Therefore Chapter 4 does not apply.

Chapter 5: Software

Notes: Evasys online surveys as well as the HTML report are web-based and intended to be used by browser. Therefore Chapter 5 does not apply.

Chapter 6: Support Documentation and Services

Notes: In scope of this conformance claim are online surveys generated by evasys and HTML reports. Therefore, requirements of this chapter actually do not apply and are not in scope of this Conformance Claim.

EN 301 549 Report

Notes: Only Chapters 4 and 9 apply.

According to "Best Practices for Authors" tables for sections which do not apply have been removed and links to standards/guidelines in headings of sections have been removed.
